## Experience

### General Assembly

Boston MA

*Web Development Immersive*

Oct 2016 - Jan 2017

Implementing real world technologies into a portfolio of projects.

Participating hands on with *methodically* figuring out bugs in programs, & how to work in a group in order to meet expectations for applications requiring Create, Read, Update, & Destroy functionalities.

Collaborated with group, combining efforts & managing time together, to create a *survey* application where users could vote with tallied answers, using HTML, CSS, JavaScript, Handlebars, Express & MongoDB.

Capstone Project for this program including harnessing Ember as a front-end framework, which relies heavily on handlebars. Harnessed bootstrap for styling & formatting, & Ruby on Rails which talked to SQL as a database. It is all for a *blog* where you sign in to effortlessly make blog posts where others can look through and peruse them.

## Technologies

HTML

CSS

SASS

Bootstrap

JavaScript

Materialize

Ajax

jQuery

Git

Github

Express

Sketch

Node

MongoDb

Ruby

SQL

Ember

Angular

### Freelance

Erie PA

*Web Designer*

Jan 2017 - Present

*Design* website for businesses & organizations with HTML, CSS, & JavaScript. Accomplishments include working with various front-end programming languages to get this project off the ground. Purchased domain, used FTP & hosting to put website online. Utilizing *Bootstrap* as a framework in building site, as well as *Material* Design for another.

## Education

### General Assembly

*Web Development Program*

Udacity Online courses:

UX Design

Android Dev

Machine Learning

### Presque Isle Downs & Casino

Erie PA

*Customer Service: Fine Dining*

Oct 2015 - Aug 2016
